

## Screening Update

Version of March 5th, 2021

### Single symptom screening

Students, children, and staff with any new or worsening symptoms of COVID-19, even students, children and staff with only one symptom, should stay at home (isolate themselves) until:

- They test negative for COVID-19, their symptom(s) improve, they no longer have a fever, and they feel well enough to go to school or work;
- If they are not tested, 10 days have passed since the appearance of the symptom(s), their symptoms are resolving, they do not have a fever and they feel better.
- They receive another diagnosis from a health professional.

### Requirements for household members of high-risk contacts without symptoms

High-risk contacts are people who have had close contact with a person who has tested positive for COVID-19. People who live in the same household as a person who has been identified as a high-risk contact and is symptom-free (asymptomatic), must stay home for the duration of the contact's self-isolation period except for the following essential reasons: going to work, school, childcare and essential errands such as groceries, attending medical appointments or picking up prescriptions.

### Guidelines for travel outside Canada

The Canadian government has updated the guidelines for travel outside the country. Please review them by [following this link](#).

### Isolation Requirements for Household Contacts of Symptomatic Persons

ALL household contacts of persons with new or worsening symptoms of COVID-19 should isolate themselves until the person with symptoms receives a negative COVID-19 test result or another diagnosis from a health care professional. If the person with symptoms does not seek testing for COVID-19, they should isolate themselves for 10 days. All household members must also isolate themselves for 14 days from the date of last contact with the symptomatic person.

### REMINDER - Lycée Claudel's self-evaluation application

Lycée Claudel's self-assessment application has been updated to reflect the new requirements. We remind you that you must complete the COVID-19 symptom self-assessment every morning for each of your children. It is available on [Pronote](#) as well as [on our website](#).
